

MOMENTUM

Routine Immunization Transformation and Equity

Industry Workers
Karnataka

MOMENTUM Routine Immunization Transformation and Equity Project, supported by the U.S. Agency for International Development (USAID), works towards last-mile COVID-19 vaccinations for vulnerable, hard-to-reach, and marginalized communities.

In Karnataka, the Project reaches people like the employees of BMLH engineering, Bengaluru.

The team works closely with local players like labour unions and community leaders to ensure equitable vaccine coverage. Project sub-awardees like TCIF have provided necessary logistical support to ensure maximum vaccine coverage.

It was through the efforts of the Project team under the leadership of the state Government that industry workers like employees of BMLH were mobilized and made aware about the COVID-19 vaccine and the advantages of getting vaccinated. Currently, all workers of BMLH engineering are completely vaccinated.

These workers have also ensured complete vaccination for their families and friends.
